Foyjul Islam Raju

SQA Engineer Aspirant | Manual & Automation Testing | Selenium | Python | Django

Dhaka, Bangladesh | +8801777-489193 | raju.ju.cse@gmail.com | Portfolio | Github

Profile

SQA Engineer Aspirant with a CSE background and hands-on knowledge of Manual Testing, Test Case Design, Bug Reporting, Selenium, Python, Pytest, Jira, and Git. Strong understanding of web applications, Django, REST APIs, and software testing methodologies, with a detail-oriented approach to ensuring software quality and reliability.

Education

Jahangirnagar University — M.Sc. in CSE, 2022–2024 | **CGPA: 3.91/4.00**

City University — B.Sc. in CSE, 2018–2022 | **CGPA: 3.89/4.00**

Skills

Programming Languages: C, C++, Python, Java, SQL

Web Development: HTML5, CSS3, Bootstrap 5, JavaScript, jQuery, Django

Machine Learning: Scikit-Learn, Pandas, Matplotlib, NLP, Data Preparation, Processing, Visualization, Data Analysis

Testing & QA: Manual Testing, Automation Testing (Selenium), Test Case Writing, Jira

Software & Tools: Microsoft Office, Lucidchart, Adobe Photoshop, Canva

Technical Support: Issue Debugging, Log Analysis, Root Cause Analysis, User Documentation

Professional Experience

IT Executive – Online Group — May 2026 - Present
- Manage and maintain IT systems, hardware, software, and network resources.
- Monitor computer systems and ensure smooth day-to-day IT operations.

Department Head, CSE – IMB Polytechnic Institute — Jan 2025 - May 2026
- Led department operations, curriculum, faculty coordination, and student projects.
- Mentored students in programming, web development, and competitive coding.

Front-End Developer – Knowledge IT Institute — Apr 2022 - Dec 2024
- Design and develop responsive, user-friendly web interfaces.
- Optimize websites for performance, usability, and cross-browser compatibility.

Project & Publication

more project →

Daraz Sign Up & Login – SQA Testing Project
- Performed Manual & Automation Testing of Daraz Sign Up & Login using Selenium, Python, and Pytest.

Early Stroke Prediction System (Machine Learning)
- Built high-impact ML model with Scikit-learn to enable early stroke detection and proactive healthcare alerts.

Chronic Kidney Disease Detection (Machine Learning – Published)
- Developed robust ML pipeline for early CKD detection, resulting in IEEE publication & improved diagnostic potential.

Doctor Appointment & Blood Bank Management System (Full-Stack)
- Created Django web app with authentication and booking features to streamline patient and donor management.

Achievements & Competitive Programming
